Global Success in the Field: The Indiana Data Exchange (IDEx) Project

*Mr. Jason Hutchens, Director, Division of Planning and Assessment,
Indiana Department of Homeland Security*

IDEx is a 21-agency effort (under Indiana Department of Homeland Security leadership) that includes federal, state, and local agency participation. By using a range of Global-supported solutions, including the GRA, Global Federated Identity and Privilege Management (GFIPM) framework, and National Information Exchange Model (NIEM), the initiative connects disparate justice and public safety systems' data for enhanced decision making and increased public safety, leveraging existing investments. Because the planning, design, and initial capital investment were grant funded, IDEx exemplifies how a state can use federal support to initiate a project resulting in immediate and long-term cost savings and efficiencies. Director Hutchens will discuss the project (emphasizing leveraging of Global solutions, and the importance of the principle of *reuse*), IDEx Return on Investment (ROI) report, and how enhanced information sharing capabilities were critical in responding to recent storms that devastated Indiana.

Anticipated Outcomes and Takeaways

- For perhaps the first time, a GAC success story includes a comprehensive Global implementation ROI study. GAC members will learn how to document such savings—a particular advantage in today's economy, when the bottom line can make or break project approval.
- Ample time for Global member question-and-answer roundtable
